# Accidents at work in January-September 2024 – preliminary data

 **3.28**

Incidence rate in January-September 2024

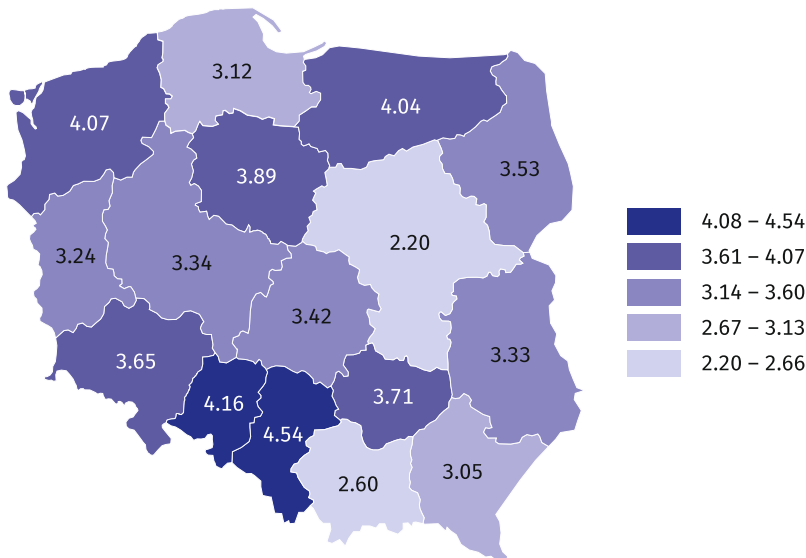

**45,660 persons injured in accidents at work were reported in January-September 2024, by 0.3% fewer than in January-September 2023. The number of injured persons per 1,000 employed persons (the incidence rate) increased from 3.22 to 3.28.**

The number of persons injured in accidents at work decreased and the incidence rate increased compared to January-September 2023

In January-September 2024, the most victims were recorded in accidents at work with other effects – 45,169 persons, 300 persons sustained injuries in serious accidents, while 191 persons were injured in fatal accidents. 199 persons were injured while performing remote work or telework.

The highest incidence rate was recorded for Śląskie (4.54), Opolskie (4.16), Zachodniopomorskie (4.07) Voivodships, the lowest for Mazowieckie (2.20), Małopolskie (2.60) and Podkarpackie (3.05).

**Map 1. Persons injured in accidents at work per 1,000 employed persons <sup>a</sup> (excluding private farms in agriculture) in January-September 2024**

The highest incidence rate was recorded for Śląskie Voivodship, while the lowest for Mazowieckie Voivodship

<sup>a</sup> The incidence rate was calculated using preliminary data on the number of employees; civilian employees of budgetary entities conducting activity within the scope of national defence and public safety were not included in the breakdown by voivodships.

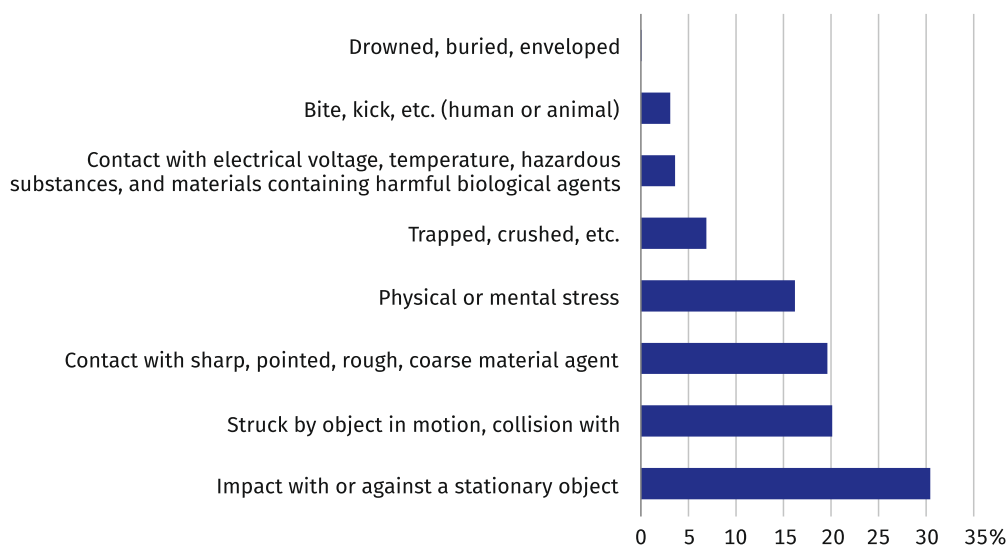

In the breakdown by types of economic activity, the highest incidence rate was recorded in the sections: Mining and quarrying (12.59), Water supply; sewerage, waste management and remediation activities (9.11) and Human health and social work activities (5.09), while the lowest in the sections: Information and communication (0.50), Other service activities (0.68) and Professional, scientific and technical activities (0.86).

**Chart 1. Persons injured in accidents at work per 1,000 employed persons by sections in January-September 2024 (excluding private farms in agriculture)**

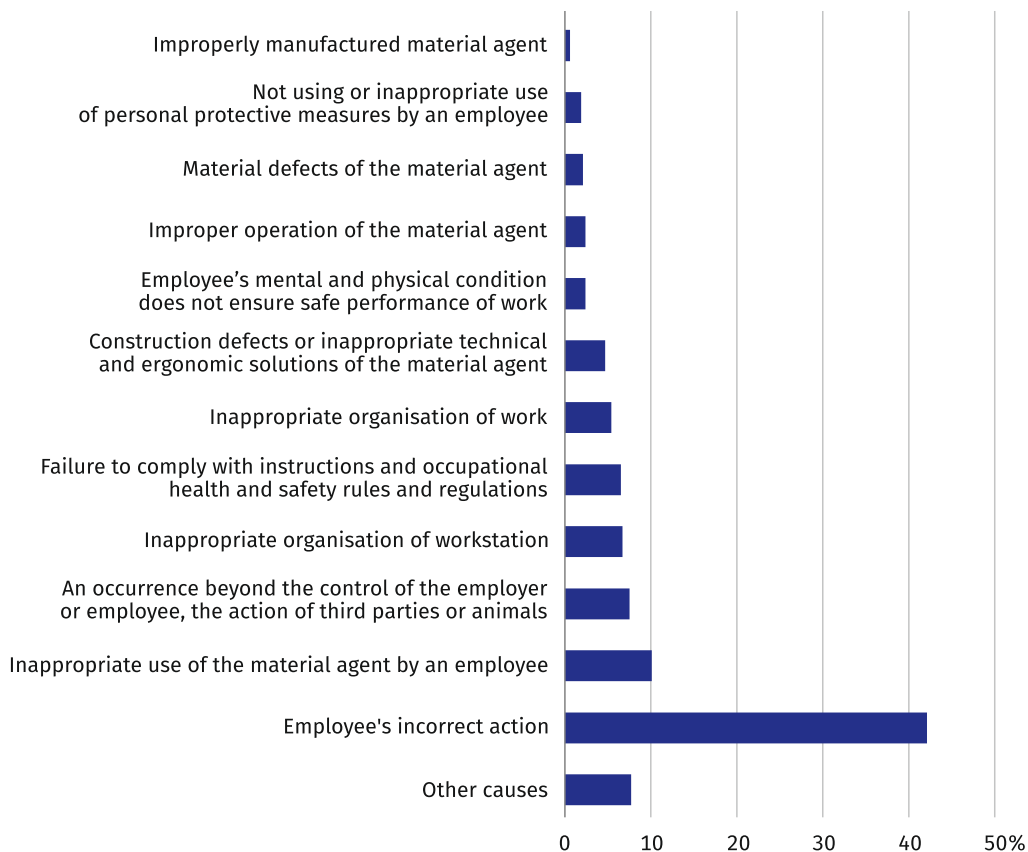

The highest incidence rate was recorded in the Mining and quarrying section, while the lowest in Information and communication

**Chart 2. Persons injured in accidents at work by contact-modes of injury in January-September 2024**

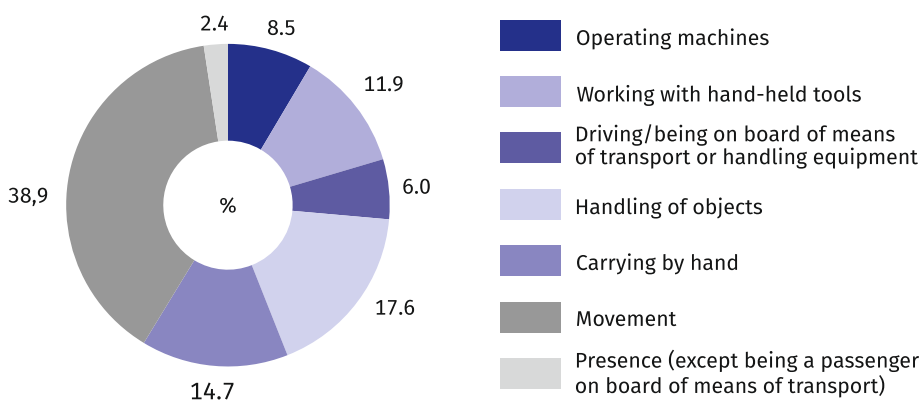

Impact with or against a stationary object was the prevalent group of contact-modes of injury (30.4%)

**Chart 3. Causes of accidents at work in January-September 2024**

Employee's incorrect action was the cause of 42.0% of the accidents at work

**Chart 4. Persons injured in accidents at work by a specific physical activity performed by the victim at the time of the accident in January-September 2024**

Movement was the most frequent specific physical activity performed by the victim at the time of the accident (38.9%)

**Chart 5. Persons injured in accidents at work by part of body injured in January-September 2024**

78.8% of the persons injured in accidents at work sustained an extremity injury

Tables are available on the website in .xlsx format.

### METHODOLOGICAL NOTES

The study presents information on **accidents at work of persons employed in the national economy**, reported in the relevant period excluding budgetary entities conducting activity within the scope of the national defence and public safety for which information on accidents at work concerns only civilian employees.

The methodology of the survey on accidents at work is explained in more detail in the annual publication titled "Accidents at work", available on the website of [Statistics Poland](#).

The data presented in this release are preliminary. The final data covering the year 2024 will be available in a publication coming out in November 2025.
