

Services Production in March 2026

15.06.2026

↑ 11.0%
Increase in services production, compared with March 2025

According to preliminary data, in March 2026 services production was higher by 11.0% than a year before (at that time, it was recorded an increase of 3.2%), and in relation to February 2026 increased by 10.7%.

Index of services production is the indicator measuring monthly changes in the volume of service production that is turnover in constant prices obtained on the market by service enterprises. The results apply to entities with 10 and more employees, which as their core activity provide services in the field of: transport and warehousing, accommodation and catering services, information technologies, data processing and other service activities in the field of information, real estate services, accounting activities, management, architecture and engineering, technical research and analysis, advertising and market research, rental and leasing, employment, tourism organisers, detective and security activities, maintaining order and cleaning inside and outside buildings of all types, and administrative office services.

After elimination of the impact of seasonal effects, in March 2026, services production was higher by 7.9% than in the corresponding month of the previous year, and in relation to February 2026 increased by 1.9%. Compared to monthly average production of services in 2021, services production increased by 31.8%.

After seasonal adjustment, the year-to-year increase in services production in March 2026 amounted to 7.9%

Table 1. Dynamics of services production (constant prices; unadjusted data)

Specification	02 2026	03 2026	02 2026	03 2026	02 2026	03 2026
	previous month=100	previous month=100	corresponding month of the previous year=100	corresponding month of the previous year=100	monthly average 2021=100	monthly average 2021=100
TOTAL SERVICES	104.5	110.7	107.0	111.0	121.7	134.2
Transportation and storage	102.3	110.8	106.5	113.8	112.3	124.1
Accommodation and food service activities	96.8	97.1	104.8	103.9	137.5	133.2
Information and communication	98.7	116.7	102.8	110.1	131.1	154.4
Real estate activities	100.4	109.4	111.0	110.4	106.6	115.2
Professional, scientific and technical activities ¹	123.3	108.8	121.2	115.0	132.4	139.9
Administrative and support service activities	103.7	105.1	101.2	106.3	112.8	117.0

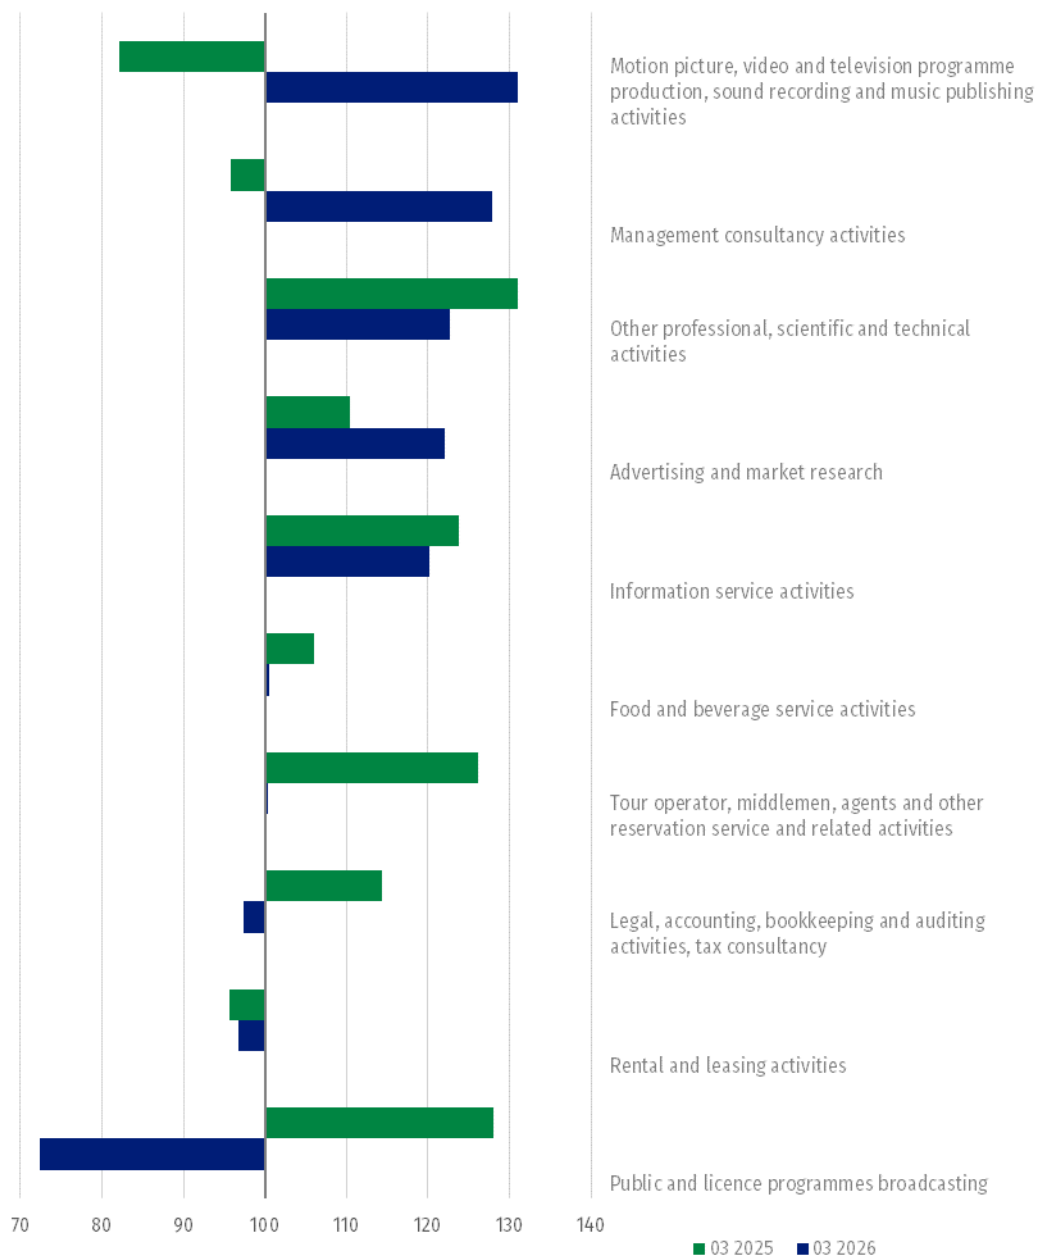

According to the preliminary data, in March 2026, in sections with the largest shares in the total index, i.e. in Section J *Information and communication* and in Section H *Transportation and storage*, a year-to-year increase of 10.1% and 13.8% respectively was recorded.

¹ Professional, scientific and technical activities, excluding activities of head offices and holding companies, excluding financial holding companies (M70.1), scientific research and development (M72), and veterinary activities (M75).

On the level of divisions, the highest increase of services production in comparison with March 2025 was recorded in the field of motion picture, video and television programme production, sound recording and music publishing activities – of 31.0% as well as in management consultancy activities – of 27.8%.

The largest decrease in services production, however, occurred in public and licence programmes broadcasting – of 27.7%, in rental and leasing activities – of 3.2% and legal, accounting, bookkeeping and auditing activities, tax consultancy – of 2.7%.

Chart 3. Dynamics of services production in selected PKD 2007 divisions (constant prices; corresponding month of the previous year=100; unadjusted data)²

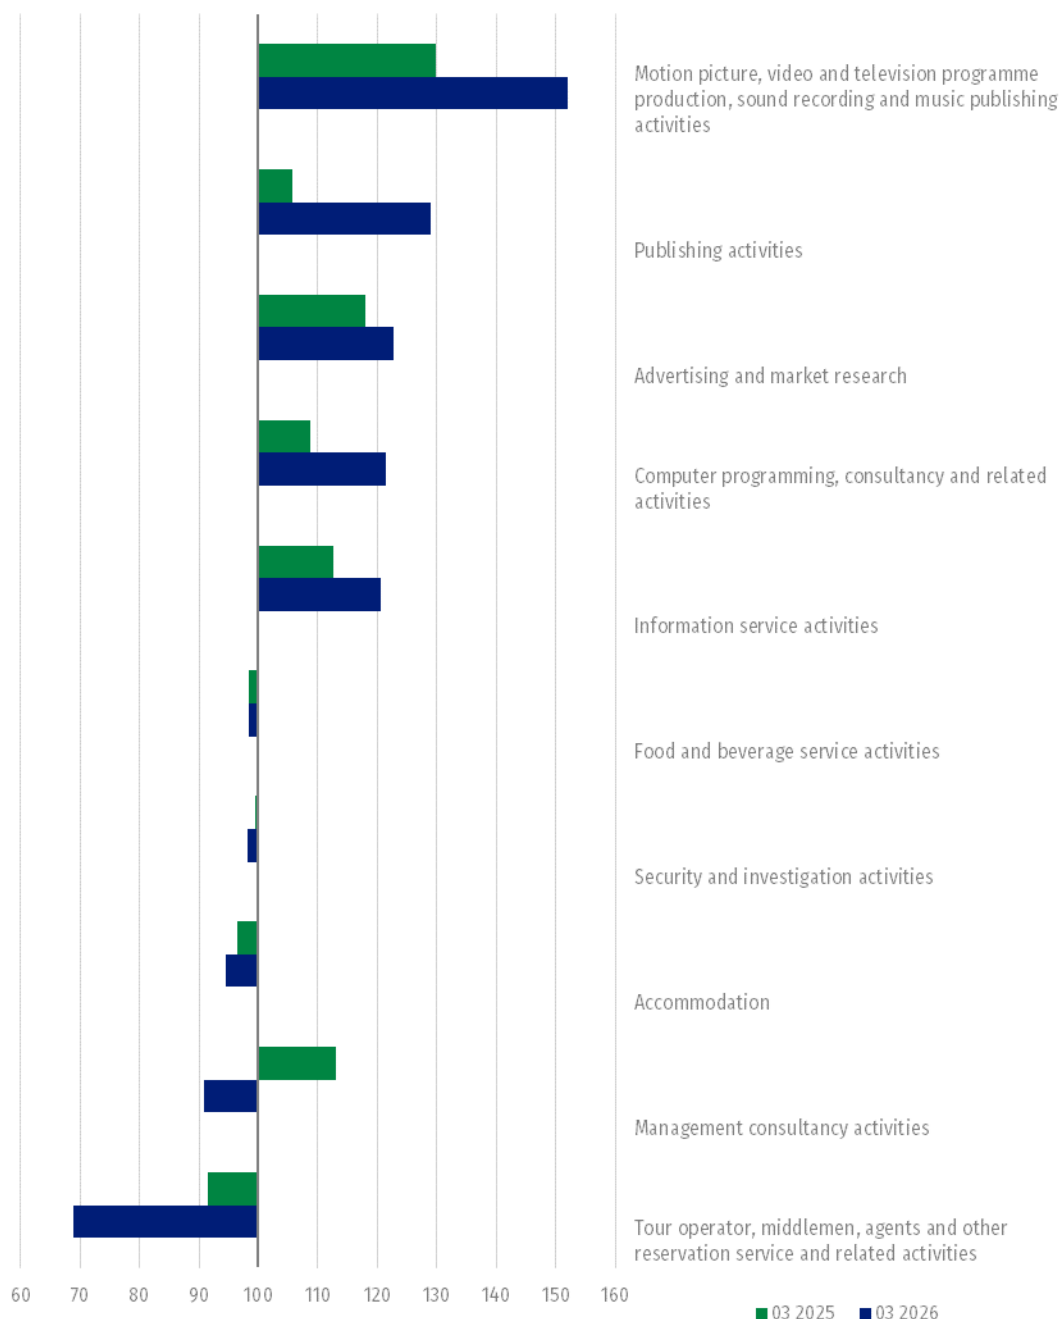

² Dynamics for all activities covered by the survey are presented in the enclosed XLSX file featuring charts. Dynamics of service production regarding water transport and air transport were not published due to statistical confidentiality.

Compared to the previous month, in March 2026, total services production increased by 10.7%. In Section J *Information and communication* an increase of 16.7% was observed, while in Section H *Transportation and storage* – of 10.8%.

On the level of divisions increases compared with February 2026 were observed in motion picture, video and television programme production, sound recording and music publishing activities – of 51.9 and in publishing activities – of 28.9%.

The highest decrease was observed in tour operator, middlemen, agents and other reservation service and related activities – of 31.0% and in management consultancy activities – of 9.2%.

Chart 4. Dynamics of services production in selected PKD 2007 divisions (constant prices; previous month=100; unadjusted data)²

Methodological note

In accordance with the Commission Implementing Regulation (EU) 2020/1197 of 30 July 2020 laying down technical specifications and arrangements pursuant to Regulation (EU) 2019/2152 of the European Parliament and of the Council on European business statistics repealing 10 legal acts in the field of business statistics, the aggregate "Production of services" includes the following service activities according to the Polish Classification of Activities (PKD 2007):

- section H *Transportation and storage*;
- section I *Accommodation and food service activities*;
- section J *Information and communication*;
- section L *Real estate activities*;
- section M *Professional, scientific and technical activities* excluding activities of head offices and holding companies, excluding financial holding companies (M70.1), scientific research and development (M72), and veterinary activities (M75);
- section N *Administrative and support service activities*.

Index of services production was developed based on the data from the following sources:

- DG-1 *Report on economic activity*;
- *SP Annual enterprise survey*;
- Survey on prices of consumer goods and services;
- Survey on services producer prices;
- Survey on prices of residential premises.

Due to the current methodology for developing the total index of services production, and index of services production for different levels of aggregation (PKD 2007 divisions and sections), it is not recommended to calculate the indexes in relation to the previous month and the corresponding month of the previous year based on the provided indicators in relation to the monthly average of annual base year (2021=100). Due to the use of the weighting system, the indicators will differ. The methodology for calculating the index of services production is consistent with the guidelines of the OECD manual ["Compilation Manual for an Index of Services Production"](#).

The data concern service entities with 10 or more employees. The basic statistical unit for which the above data was developed is the "legal unit". The definitions of statistical units, including the "legal unit", was specified in Council Regulation (EEC) 696/93 of 15 March 1993 on the statistical units for the observation and analysis of the production system in the Community.
